About Nest-In

Nest-In is a modular construction solutions brand from Tata Steel known for its speed of construction and its ability to serve even the remotest locations.

With a presence all over India and extensive experience in shelter spaces and sanitation, it has worked with over 100 urban local bodies and major corporate entities like Nestle, Mercedes Benz, TCS, Dupont amongst many others.

In the wake of the novel Coronavirus outbreak and the challenges it posed, Tata Group and Tata Steel resolved to help the nation on multiple fronts.

One such front was effective management and treatment of the large number of prospects and patients affected by the virus in order to aid speedy recovery and contain the spread.

This would require major enhancement of healthcare infrastructure including Hospitals, Medical Clinics, Isolation Rooms, Toilets, etc.

Given Nest-In's expertise and experience in the community construction solutions space, it took up the task of designing, developing and executing customized solutions for health infrastructure.

Our Solutions

From conversations with the healthcare sector, Nest-In realized that the most critical requirements at this point were high quality isolation rooms and quarantine wards.

The team sought guidance from experts within Tata Steel and from other institutions within Tata Group to develop its own specialized solutions of Modular Isolation Rooms and Quarantine Wards.

Further offerings such as Sample Collection Kiosks and Sanitizing Tunnels were also developed subsequently on identifying the market need.

ICU Rooms,
Doctor Cabins

Temporary
Clinics

Portable
Toilet

CUSTOMIZED CONTAINER TOILETS

A major application of the MobiNest Cabins comes in sanitation, a segment where Nest-In has tremendous expertise. Portable toilets, commonly supplied to industrial and construction sites, are highly relevant today as temporary sanitation units at isolation facilities.

In fact, Nest-In has already supplied its first order at the Covid-19 Isolation facility in Sambalpur.

Layouts customizable with urinals/ toilets provided as per client requirement

COVID-19 SWAB COLLECTION UNIT

With the growing need to tackle the highly contagious aspect of the Covid-19 virus, it is critical that swab collection happens in a hassle-free and safe way. Which is why Nest-In has designed this Covid-19 swab collection kiosk that ensures a risk-free process without exposing the healthcare professional to risk of infection.
